Overview

I am a Postdoctoral Researcher at the Cosmic Dawn Center, National Space Institute (DTU-Space), Denmark. My research focuses on studying galaxy evolution through the use of state of the art observations of high-redshift star-forming galaxies.

Employment

2020 – **Postdoctoral Researcher |** Technical University of Denmark (DTU), Lyngby, Denmark

Current research interests include: High-redshift, star-forming galaxies, morphology, kinematics, metallicity, integral field spectroscopy, galaxy evolution and formation. I am part of the Cosmic Dawn Center at DTU and I am a member of the MIRI GTO team working on the *JWST* MIRI HUDF Imaging Survey.
